Five Mile Angus Autumn Bull Sale

Friday 6 March 2026

Inspections from 10:30am | Sale 1pm

On property and Online with Auctions Plus
934 Benalla Warrenbayne Rd, Warrenbayne VIC 3670

Welcome!
Thank you for your support and interest in our 2026 Bull sale.

We are excited and proud to present this line up of bulls for sale. They are an excellent representation of our hard working females and type of consistent cattle we aim to breed.

We use these same genetics in our own commercial operation with success and look forward to hearing how they work for you.

Please reach out to us or the team at Rodwells Benalla with any questions or to view cattle prior to the sale.

Warm regards
Pete, Jess and Family.

This fellow is owned by our nephew Charlie Ireland and was the last Irelands Vicky Z15 embryo left. This meaty bull is a dead ringer for his impressive father in weight, frame and phenotype. Vicky Z15, Irelands Angus top producing female of all time, is the trifecta of a stacked pedigree, generations of performance and predictable progeny. A bull bred in the purple, that comes with a powerhouse of genetics behind him.

Weight: 642kg

Scrotal Circumference: 37 cm

An embryo from Jess's family stud (Dispersed in 2003) Kyloh Angus. This bull was the last embryo left from their great female Kyloh Ella J7. Whose progeny won at the Angus National Show and Sale multiple times. V20 was one of the heaviest at weaning, is very quiet and is growing into a strong, deep bodied, easy doing bull.

Weight: 692kg

Angus Australia Disclaimer and Privacy Information

Attention Buyer

Animal details included in this catalogue, including but not limited to pedigree, DNA information, Estimated Breeding Values (EBVs) and Index values, are based on information provided by the breeder or owner of the animal. Whilst all reasonable care has been taken to ensure that the information provided in this catalogue was correct at the time of publication, Angus Australia will assume no responsibility for the accuracy or completeness of the information, nor for the outcome (including consequential loss) of any action taken based on this information.

Parent Verification Suffixes

The animals listed within this catalogue including its pedigree, are displaying a Parent Verification Suffix which indicates the DNA parent verification status that has been conducted on the animal. The Parent Verification Suffixes that will appear at the end of each animal's name.

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV: both parents have been verified by DNA.

SV: the sire has been verified by DNA.

DV: the dam has been verified by DNA.

#: DNA verification has not been conducted.

E: DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

Privacy Information

In order for Angus Australia to process the transfer of a registered animal in this catalogue, the vendor will need to provide certain information to Angus Australia and the buyer consents to the collection and disclosure of that information by Angus Australia in certain circumstances. If the buyer does not wish for his or her information to be stored and disclosed by Angus Australia, the buyer must complete the form included below and forward it to Angus Australia. If the form is not completed, the buyer will be taken to have consented to the disclosure of such information.

Buyers option to opt out of disclosing personal information to Angus Australia

If you do not complete this form, you will be taken to have consented to Angus Australia using your name, address and phone number for the purposes of effecting a change of registration of the animal(s) that you have purchased, maintaining its database and disclosing that information to its members on its website.

I, the buyer of animals with the following identities

from member _____ (name) do not consent to Angus Australia using my name address and phone number for the purposes of effecting a change of registration of the animals I have mentioned above that I have purchased, maintaining its database and disclosing that information to its members on its website.

Authorised Name: _____ Signature: _____

Date: _____

Please forward this completed consent form to Angus Australia, 86 Glen Innes Road, Armidale NSW 2350

The suffix displayed at the end of each animal's name indicates the DNA parentage verification that has been conducted by Angus Australia.

PV : both parents have been verified by DNA
SV : the sire has been verified by DNA
DV : the dam has been verified by DNA
: DNA verification has not been conducted
E : DNA verification has identified that the sire and/or dam may possibly be incorrect, but this cannot be confirmed conclusively.

All bulls have been...

- ☑ Pesti + Vibrio + 7in1 Vaccinated
- ☑ Semen tested with Pass
- ☑ Angus Australia registered with TACE data - Raw data available on request.
- ☑ Crush side vet checked (legs, feet, genitals and temperament)
- ☑ DNA Parent Verified (Those that are still pending are marked as such)
- ☑ Handled by all ages and abilities. We take safety very seriously.
- ☑ Raised, fed and managed with longevity and well being in mind.

A word from Dr Anna Manning BVetMed, Delatite Veterinary Services.

Jess and Pete have done an outstanding job bringing this group of next sires to sale day, with an excellent turnout on offer.

As always, the bulls are presented in top working condition and are ready to perform in your herd and deliver proven results. At the recent, Veterinary Pre-Breeding Bull Soundness Examination the bulls were identified to have some ringworm lesions.

Please be assured that minor skin blemishes are temporary. Ringworm is a common fungal infection of the hair follicle and is widely regarded as a normal “growing up” condition in young cattle. Animals develop immunity over time and the infection resolves naturally.

All bulls have been treated on three occasions with iodine washes. As with all new introductions, purchasers are encouraged to follow standard biosecurity protocols and isolate new bulls for the recommended 28-day period to minimise the risk of transfer into their herd.
